MAGNUS

SEAMLESS DISTRIBUTION

Take Your Business To The Edge
With Future-Forward Solutions From MAGNUS

About US

Magnus is an authorized distributor of the world's leading technology products and has the top brands in Wireless & Networking, Unified Communications, Security Surveillance, Server & Storage, Cyber-security and more.

We are committed to delivering services with unmatched quality and value to our broad network of channel partners.

Our Vision

To be one of the leading Value-Added Distributor in the region.

Our Mission

To be a Distributor of choice.

Value Added Distributor

Magnus leverages its direct relationships with world class technology vendors to provide solutions that meet the most demanding needs of our partners. We support our partners with products specializing in Networking, Wireless, Unified Communication, Security Surveillance, Server & Storage and Cyber-Security Solutions.

Teamwork Makes It Possible

Services to our partners covers everything from consulting, assessment, design, implementation and support.

Pre-sales

Our teams of accredited industry experts work closely with our partners from the very onset of a project, offering complete pre-sales consultancy and solution design services as well as existing design configuration and review.

Warehousing

With efficient warehouse facilities we ensure that the distribution   process is smooth, coherent and the inventory is safe during the whole process.

Logistics

Magnus ensures the seamless movement of products from the warehouse to the customer location. We provide all the required support to ensure the delivery of products without delays.

Training

We arrange regular and customized training sessions on the latest technologies and product developments, in collaboration with our vendor partners.

Marketing

An aggressive marketing team ensures that every brand gets the visibility to their right market. With the effective use of digital channels, we run demand generation campaigns and thereby increasing brand awareness.

D-Link is a globally recognized leader in networking technology, offering a comprehensive range of solutions for both business and home users. Their portfolio includes networking, broadband, wireless, data/voice communications, and converged digital connectivity solutions. With a focus on innovation and quality, D-Link designs products that enable seamless connections, resource access, and communication among consumers and businesses worldwide.

NETGEAR®

NETGEAR is a leading provider of cutting-edge networking solutions with a rich heritage spanning decades. Netgear has earned a stellar reputation for delivering high-performance, reliable, and user-friendly products. From advanced routers that ensure lightning-fast internet speeds to smart switches that optimize network performance. They offer a comprehensive range of solutions to meet the demands of modern connectivity whether you're a home user, small business, or enterprise. Netgear's innovative technologies, intuitive interfaces, and robust security features will elevate your networking experience.

Fibrenetix is a market-leading manufacturer known for its high-performance Video Optimized Servers and Storage Solutions. With over 25 years of industry experience, Fibrenetix has built a strong global reputation for delivering European quality, scalability, and reliability in their products. Initially focusing on the European post-production market, the company has expanded to cater to the growing demand for data and video storage, offering AI-capable equipment for video analytics in the Surveillance and Media & Entertainment industries. Recently, Fibrenetix has developed a unique software solution called Smart Vehicle Management (SVMS), providing ruggedized Servers for small form factor vehicle installations. With headquarters in Roskilde, Denmark, and a sales and technical office in Dubai, UAE, Fibrenetix serves key customers across industries such as Aviation, Construction, Government, Hospitality, Military, and Oil & Gas, with a strong presence in the Middle East, Europe and Japan.

MICROLINK NETWORKS is an independently-owned company based in New York with offices in Texas and Virginia. We have been supplying solutions to the telecommunications, hospitality, security, and automation industries for decades and have grown from what was once a small company to become a major industry player. This growth enables us to consistently offer you the best-performing solutions based on our high-value products and full-line support. We built our reputation on them to provide superior inter-connectivity product designs and solutions. We stand behind our mission statement.

Infrastructure

At MICROLINK NETWORKS, we develop & innovate high quality Infrastructure, Automation & Security products to help you to build your advanced security surveillance system and infrastructure to achieve your objectives.

Data Center

From consolidation and cost control to quick deployment and zero downtime, MICROLINK Fiber Optic and Copper Structured Cabling solutions create the data centers of tomorrow.

Network

We develop Next-generation Data network solutions, with hyper-scale and ultra-low latency and provide state of the art infrastructure solutions public and private sectors and data centers across the globe.

Security

We create and focus on advanced VMS, surveillance hardware, & developing customer relationships and we are motivated by the creative approach & processes which enable us to deliver quality products and support to our partners.

Automation

At MICROLINK we innovate the next generation of smart living and provide all kinds of automation, access controls, hospitality, SMART home solutions and much more. our services include full scope end-2-end industrial automation design and process optimizations.

Parking Solution

We offer complete parking management solutions featuring SMART parking guidance and integrated management solutions ranging from small-scale buildings to large-scale high-density projects like universities, government buildings, courts, exhibition centers, hotels, shopping malls, factories, airports, drydocks, public parks and sustainable cities. Our intelligent services are integratable, scalable and affordable.
